

1. Transition to Open Access

Gold Open Access

IOPP will not charge for Article Publication Charges (APCs) on 12 gold open access Articles per year where these have corresponding authors affiliated with b-on member institutions (the "Authors") for publication in fully gold open access journals ("Eligible Articles").

To be eligible to claim one of the 12 APCs, the Author shall identify at the submission stage of the article that they are a corresponding author at an Institution within b-on. If the Author does not identify this at submission, then the article will not be treated as an Eligible Article.

IOPP will then confirm whether they are eligible to publish the article for free or whether payment will be required.

IOPP will check eligibility for inclusion of corresponding authors based on their submitted affiliation as compared to the b-on member list.

IOPP reserves the right to change any or all of the applicable APCs every calendar year.

2. Articles

2.1 Deposit of Articles

If an APC is paid for an article that is being published on a gold open access basis, the Eligible Article will be published under a Creative Commons CC-BY licence. This means that it can be posted to institutional and subject repositories immediately in accordance with the terms of that CC- BY licence.

2.2 Granted Rights

The IOPP standard gold open access licence is Creative Commons CC-BY, with payment of an APC or a waived APAC if the article is one of the 12 annual articles identified in section 1.

2.3 Clarity of licensing terms at the article level

Each article will have the licence detail both on downloaded articles (such as PDFs) and the online version. IOP table of contents/abstract pages will indicate whether an article is gold open access, and this data will be within the metadata and sent to CrossRef. The publication date will be clearly visible in article details and metadata.
